Experience

Android Development Intern NOV 2018 to PRESENT *ClassCalc Inc, Los Angeles*

Worked on the Android version of their product remotely. Wrote code for existing and new features. Gained experience writing production ready code, team collaboration using Git, and the quality assurance workflow.

App Testing/Research Intern AUG 2018 to JUN 2018 *bluCursor Infotech Pvt. Ltd, Indore*

Contributed data inputs involving research for adding and improving the content of their social platform. I also performed testing of the application and provided feedback.

I also studied the UI/UX of the application, and produced mockups for improvements.

Projects

Mark Entry system for college / Vue.js

A project undertaken by a team of students, backed by the college, to create a system for mark entry by faculty. I was the Vue.js developer responsible for creating the web version of the app. I also did UI design for the Android app version.

Android app for college / Android, Kotlin

A project undertaken by a team of students, backed by the college, to create an app for easy forwarding of information by the faculty to the students. I did quality assurance work. made UI Designs and wrote code for the Android app.

Quick Writer app / Android, Java

A simple, elegant notes app for Android, with focus on simplicity and elegant UI design. Uses the Android SQLite persistent storage to store text notes created by the user. Available on GitHub.

+ Several other minor Android applications and web/frontend work.
